

Cotton Disease Guide

Cotton Leaf Curl Virus

Symptoms:

- Leaves curl upward
- Yellowing of leaves
- Stunted plant growth

Management:

- Remove infected plants
- Control whitefly population
- Use recommended insecticides
- Maintain proper nutrition

Recommended pesticides:

- Imidacloprid
- Acetamiprid
- Thiamethoxam

Note: Always follow the advice of your local agriculture officer before spraying any pesticide. Read and follow the product label for safe and effective use.
